

1. Die-cut out of desired material.

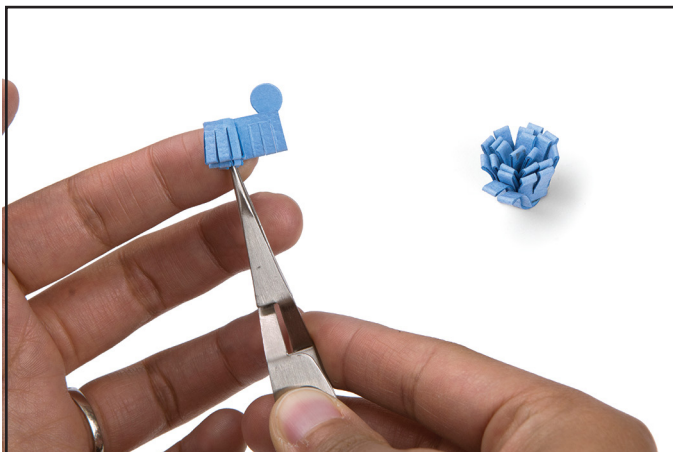

2. Apply glue to the tabs on the petal pieces.

3. Adhere the adjacent petal to the glued tab. This will create contour to the petals.

4. Fold the stamen in half.

5. Using tweezers, roll the folded stamen toward the round base tab. Once the stamen is rolled tight, apply adhesive to the base tab, and fold it onto the bottom of the rolled stamen.

6. Embellish as desired.
